PROFILE

Senior Frontend Engineer focused on **React** and **TypeScript**. I build fast, accessible and maintainable UIs, with solid state patterns (Zustand), modern styling (Tailwind, shadcn/ui) and thoughtful animations (Framer Motion). Comfortable integrating **.NET/REST** backends and working with CI/CD and multi-environment releases. I value performance, clean architecture and collaborative delivery.

PROFESSIONAL EXPERIENCE

Software Engineer — Grupo Monge 2023 – Present

Managua, Nicaragua (Hybrid)

- **Cross-Sell Post-Purchase (2023)**. Implemented a WhatsApp-based flow that sends a shortlink to a dynamic landing with product recommendations from the same family as the purchased item (e.g., phone → smartwatch/earbuds). Built reusable UI components and automated content, reducing manual effort and improving discoverability.
- **Financial Virtual Assistant (2024)**. Delivered a conversational assistant for *read-only* banking operations: retrieves payment/transfer history and answers FAQs. Secured contextual flows and auditability; no transaction execution in this phase.
- **AI Recruiting Assistant (2025)**. Implemented CV parsing and candidate scoring to standardize screening and shorten time-to-review for HR.
- **Tech used**. React, **Blazor**, .NET 6/8, REST, SQL Server, **Tailwind/Bootstrap**, Azure, GitHub.

MoPetCo Corporate Website Feb 2025 – Apr 2025

Freelance Project

- Built a responsive website with **React (Vite) + TypeScript + Tailwind**.
- Implemented secure contact/booking forms with SMTP and **reCAPTCHA**; deployed with continuous updates to **Namecheap — SmarterASP**.
- Mobile-first layout and accessible components; documented setup and maintenance.

TECHNICAL SKILLS

Frontend: React, Blazor, React Native, Vite

State & UI: Zustand, Tailwind CSS, shadcn/ui, Responsive Design, Accessibility (ARIA), Framer Motion

Languages: TypeScript, JavaScript (ES6+)

Backend/Cloud: .NET 6/8, REST APIs, SQL Server, Azure Blob Storage, Application Insights

DevOps/Tools: Azure DevOps (Repos/Boards/Pipelines), GitHub, CI/CD, Netlify, Firebase, Docker (basic)

Other: ChatGPT API, Email/WhatsApp integration, reCAPTCHA, SEO fundamentals

EDUCATION

B.Sc. in Systems Engineering 2017 – 2022

Universidad Nacional de Ingeniería (UNI)

Managua, Nicaragua

Specialized Courses 2021 – 2022

UNI *Web Design, Web Development, Information Security*

LANGUAGES

Spanish — Native

English — Intermediate (B2)
