Edwin Torrez – Frontend Developer

PROFILE

Frontend Developer specialized in React and TypeScript, with experience building modern, accessible, and scalable interfaces for industries such as retail, finance, and HR. I'm passionate about clean UI, performance, and user experience. Skilled in Tailwind CSS, Shadcn/UI, and design libraries like Aceternity. I thrive in Agile teams and follow best practices with GitFlow and CI/CD pipelines.

PROFESSIONAL EXPERIENCE

Frontend Developer – Grupo Monge

Financial Virtual Assistant (2024):

Developed a GPT-4-based conversational UI for users to manage cards, payments, and transfers.

- Designed secure, context-aware flows for sensitive operations.
- Used component-based architecture and async services.
-

Stack: Blazor (.NET 8), SQL Server, Tailwind CSS, REST APIs, Azure.

Automated Cross-Selling System (2023):

Built reusable components to automate post-purchase product recommendations via WhatsApp.

- Increased conversion by 22% through targeted messages.
- Reduced manual follow-up time by 40%.

Stack: .NET 6, HTML5, CSS3, SQL Server, SignalR, Azure Blob Storage.

AI Recruitment Assistant (2025):

Implemented a system to analyze CVs, score candidates, and auto-redirect them based on fit.
- Created internal prompt workflows and reporting dashboards.

Stack: .NET 8, REST APIs, ChatGPT-4, Prompt Engineering, SQL Reporting.

HIGHLIGHTED PROJECTS

MoPetCo Corporate Website (Freelance) Feb 2025 – Apr 2025

Built a responsive website for a pet grooming business with contact form and gallery.

- Integrated SMTP and Google reCAPTCHA for spam protection.
- Deployed to production with mobile-first design.

Stack: React 19, Vite, TypeScript, Tailwind CSS, Firebase, Netlify, Google Cloud.
